

REMARKS

The specification has been amended to add a Sequence Identification Number to the Brief Description of the Figures for the sequence shown in Figure 1. The specification has also been amended to correct inadvertent errors in certain of the Sequence Identification Numbers. Finally, the specification has been amended to replace the Sequence Listing filed March 29, 2002 with an amended Sequence Listing being filed concurrently herewith.

The Sequence Listing has been amended to add two sequences that were inadvertently omitted from the Sequence Listing filed March 29, 2002. Support for the amendments is found throughout the specification as originally filed and, for example, in Figure 1 and at pages 126 and 128. The Sequence Listing has also been amended to change certain of the descriptions of the features to comply with the Patent 3.3 guidelines.

Respectfully Submitted,

Date: *October 22, 2004*
